Elevator Technology

The pinnacle of German engineering and Italian design

The H300 home lift,
designed for you, using
gearless technology

thyssenkrupp

H300, Precision engineering with design you'll love.

Performance with style.

Experience the best in German engineering and Italian design through thyssenkrupp's range of Home Lifts. Embrace efficient engineering from a world-class elevator company with H300 home lift, a durable and quality solution for your home.

"The H300 delivers true comfort and efficient engineering in every detail."

Join the thyssenkrupp family and become one of our thousands of satisfied home lift users. If you have any questions or require any more information about our products and services, please get in touch.

Yours sincerely,

Dirk Marschall, CEO

True German engineering from a world-class elevator company.

Design that will excite you.

Embrace the best of Italian Design with a extensive range of sophisticated, elegant and stylish options. Find the perfect combination of colours, materials and options to ensure the perfect fit in your home.

From our world-class elevator expertise we have developed the best possible solution for a home lift which offers numerous configurations and a range of platform sizes for almost every requirement.

H300 utilises the best-available home lift technology, offering a solution which is extremely energy efficient and is near silent. Combine this with our thorough approach to engineering, and our love of Italian design, you are sure to have found a solution which is environmentally friendly, unobtrusive and will integrate beautifully into your home.

As for all of our home lifts, safety and comfort are the pillars of our design and they are delivered from our German heritage, the components used and our precise attention to detail.

Quieter than a quiet room.

Through our expertise in engineering we have developed a high-quality gearless home lift which is ultra-quiet. The result is a high performance addition to your home that you hardly hear even when you put your ear right next to it. Combine this with our stop start technology, our beautiful cabin styles and options, and you've got the perfect home lift.

Safety is in our DNA.

H300 home lift boasts an extensive list of safety features; as standard the mechanical components carry a SIL3 certified safety system making it the highest safety standard on the platform lift market. Unlike some home lifts, we have a separated safety system, away from the OSG, which means it will not be affected by mechanical faults. Your safety is our priority.

In case of a power failure, H300 will continue to work from a battery, allowing the user to reach the ground floor safely. It is also possible to connect fire alarm systems to the main electronic board on the home lift.

Comfort.

We believe travelling between floors in your home shouldn't be a difficult or uncomfortable experience. Taking advantage of the gearless technology found in H300 enables us to deliver a smooth and quiet journey from start to finish. In addition, all of thyssenkrupp's home lifts come fitted with soft-start/stop technology.

Each lift is fitted with a handrail and push to run buttons making the journey as seamless and safe as possible.

Designed for you,
down to the smallest detail.

H300 home lift will prove to be a remarkable addition to your home. Our love of Italian design is proven in the numerous design options and available features.

Choose from numerous cabin styles through an extensive range of materials and colours for the cabin walls. You can choose satin and scratch-resistant steel, or textured and plain finish modern walls, or opt for the vivacity of the infinite colours of the RAL range, in a game where releasing your imagination will be simple.

Have fun with the numerous combinations available. In addition, H300 offers numerous other finishes not found on any other home lift.

With the thyssenkrupp home lifts, you can finally treat yourself to all the style and comfort that you want, enhancing your environment with an extremely captivating and contemporary design object.

Features and options

Ensure the perfect finish by selecting a colour from the near-infinite RAL range.

Suspended ceilings offer LED lighting in three different versions.

The steel cabin frame includes the control operating panel, baseboard, upper covering and corners.

The elegantly designed central console operates the doors and movement of the lift.

Ensure the perfect finish with a large selection of flooring.

A range of platform sizes.

The thyssenkrupp H300 is available in a range of platform sizes to ensure the perfect fit - ideal for tight spaces, wheelchair access and large cabin sizes.

Cabin and landing doors.

Cabin with sliding doors follows the basic conventions of a public elevator.

Complete with automatic cabin controls, cabins are available in a selection of high pressure laminates, stainless steel, or RAL painted at your choice.

Cabin with folding doors offer a completely enclosed solution with low encumbrances.

Complete with automatic cabin controls, cabins are available in a selection of high pressure laminates, stainless steel, or RAL painted at your choice.

Platform wall colours.

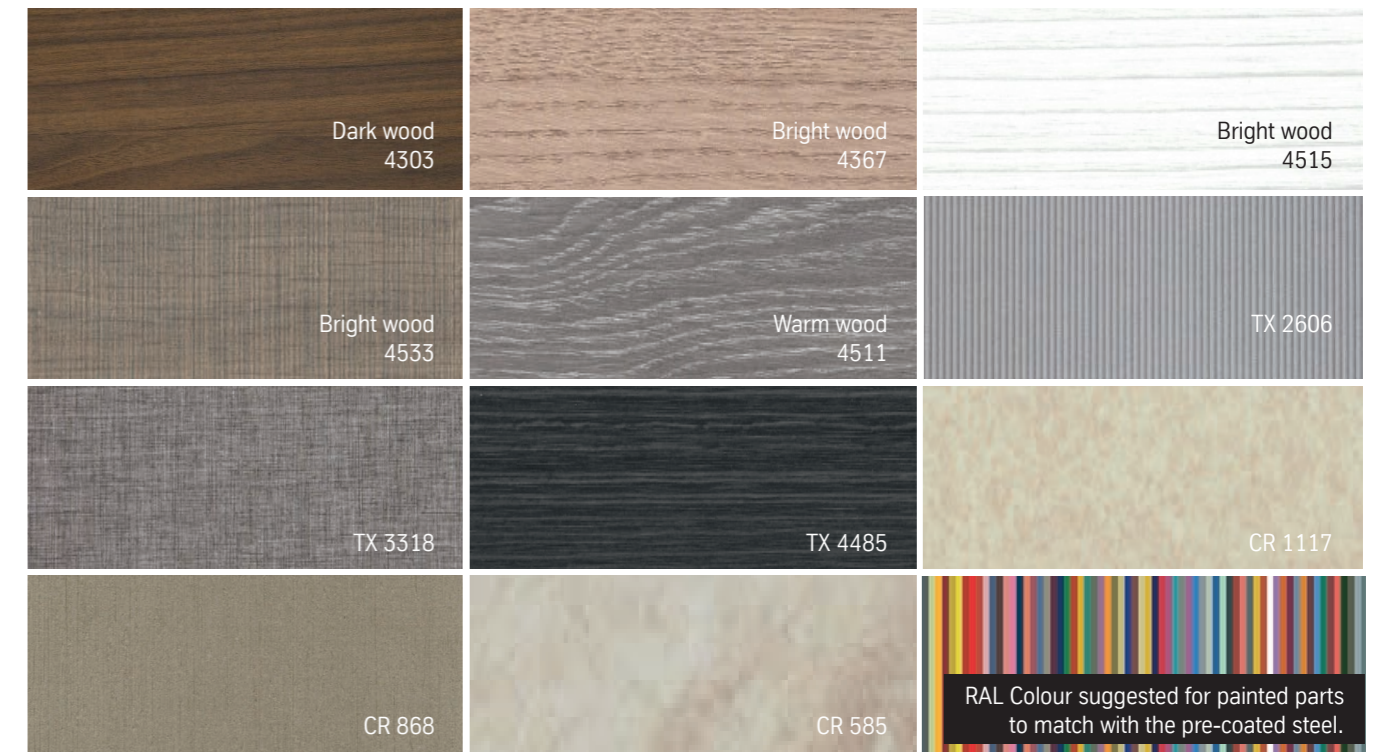

Cabin flooring.

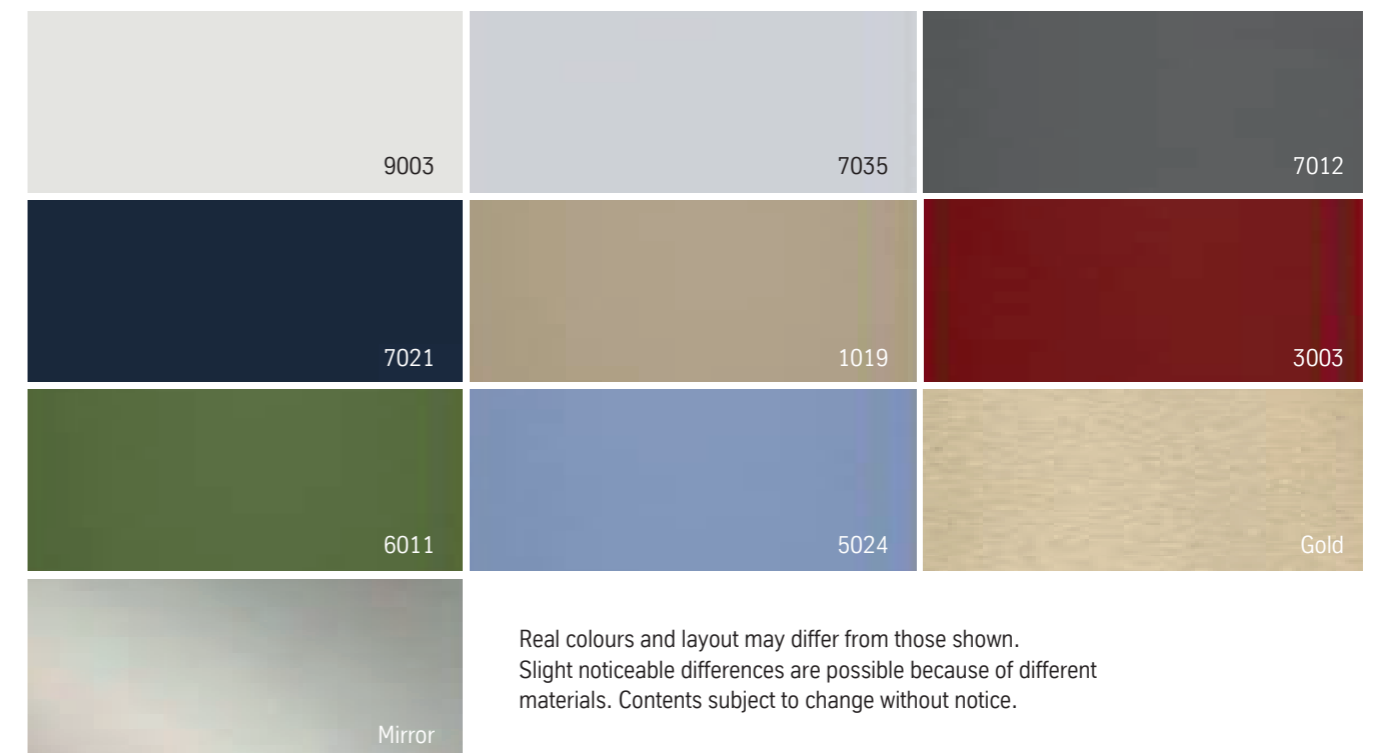

Choose to have your lift delivered without flooring, if you want to apply your own. Max 3mm flooring for flush top alignment.

Platform wall colours.

Central Panel.

Real colours and layout may differ from those shown.
Slight noticeable differences are possible because of different
materials. Contents subject to change without notice.

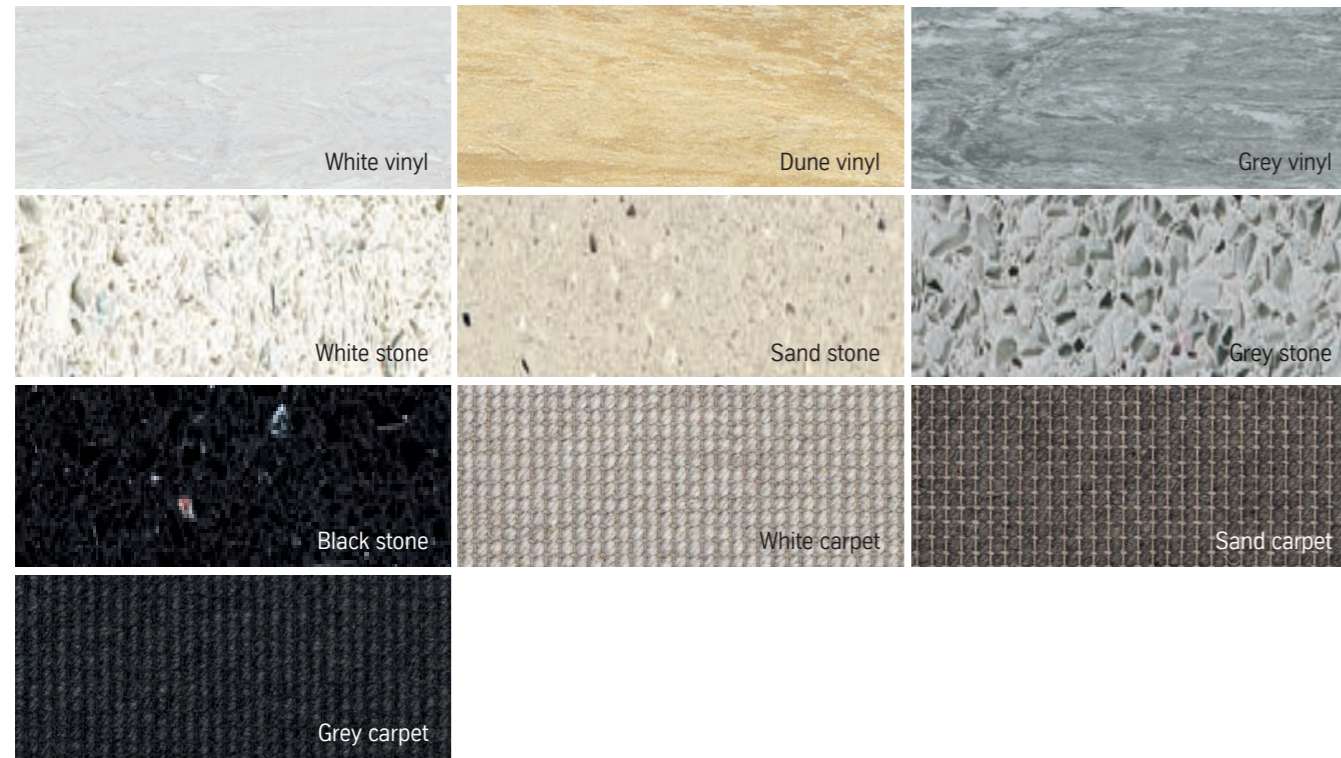

A world of choice.

Take advantage of even more options to ensure the perfect finish when you choose 'Elegance'.

As well as additional colours and finishes, choose from a range of suspended LED ceilings, control operation panel colours and handrail colours, cabin walls and floors.

Cabin flooring.

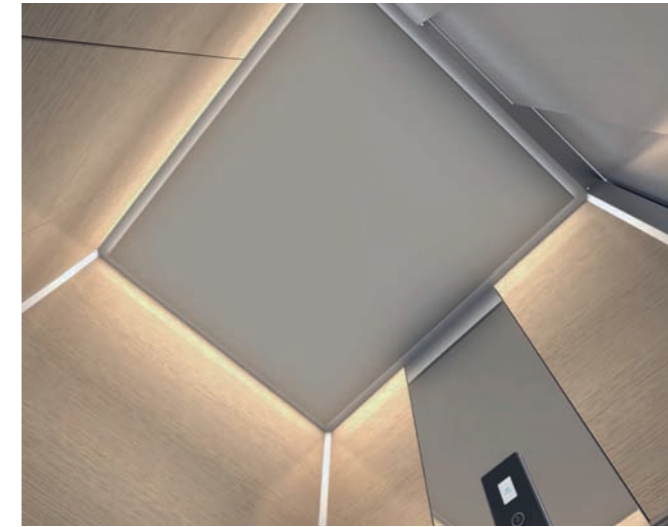

Choose between the following options for safety vinyl flooring with guaranteed life time non-slip.

Control Operation Panel.

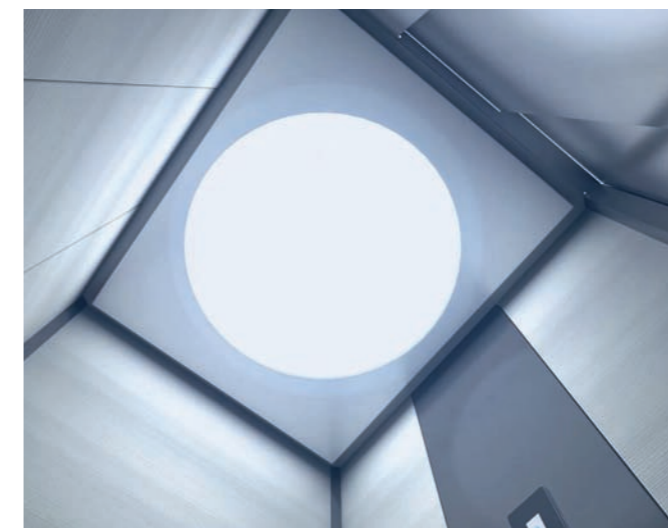

Ceiling and lighting.

As standard each home lift comes with the Steel floating ceiling with LED lights.

Maximise the light available when you choose to the Opal ceiling with LED lights.

As an option, choose the Round Ceiling and LED lights as a unique design element.

The Starry Sky ceiling gives the illusion of a clear night's sky.
