**Ecological Innovation
for Your Interiors**

ECO Tiles in Brand New Colours

We make great efforts to protect the environment and reduce waste in nature. ECO labelled tiles are manufactured using 100% recycled plastics, helping to minimise plastic waste. With our tiles, you can contribute to environmental sustainability while creating a beautiful and functional interior environment. Our latest collection includes new colour options – brown and blue. With these innovations, we will make not only your interior stand out, but also our commitment to environmental sustainability.

Not only will we save plastics from landfill, but we will also save 5,496,00 kg of CO₂ per year, equivalent to the emissions of almost 1,000 cars and save 725,000,000 litres of water.

Fortelock Industry, ECO Blue

Quality and Durability

Although our tiles are made from recycled plastic, we place great emphasis on their quality and durability. They are designed to withstand heavy loads and a variety of chemicals while being easy to maintain. For example, Fortelock tiles in the **Industry Ultra** option **can withstand loads of up to 6,600 kg without taping**. In addition, their surface provides anti-slip properties, which means safety and comfort for everyone who uses them.

Invest in the Future

By choosing our recycled plastic interior tiles, you are not only investing in your interior, but also in the future of the environment. With new colour options, you can create an aesthetically pleasing and environmentally responsible environment. Join us in protecting the planet and create an interior that reflects your personal style while supporting sustainable development.

Do you know where the new colours are particularly suitable?

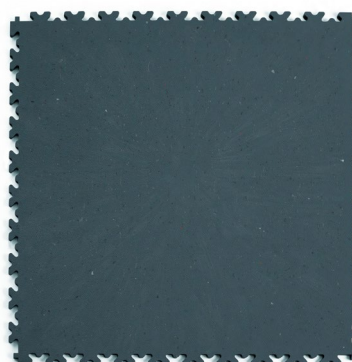

Fortelock Industry, ECO Brown

Fortelock Industry ECO Brown

Brown colour is the perfect choice for those who desire natural and warm tones in their space. It is a colour that evokes natural elements such as wood, sand and earth, creating a harmonious and pleasant environment.

Fortelock Industry Ultra ECO Blue

Blue colour brings freshness, peace and harmony. It is ideal for spaces where you want to create an appealing and trendy look. The blue colour helps to create a feeling of cleanliness and relaxation, which you will appreciate especially on heavy and tiring days. In addition, the **Industry Ultra** option can withstand extra heavy loads of up to 6,600 kg without taping.

Made of 100% recycled PP
