

Only 2.5 tiles

NEW

= 1 m²

Large format tiles

Larger and thinner than you expect

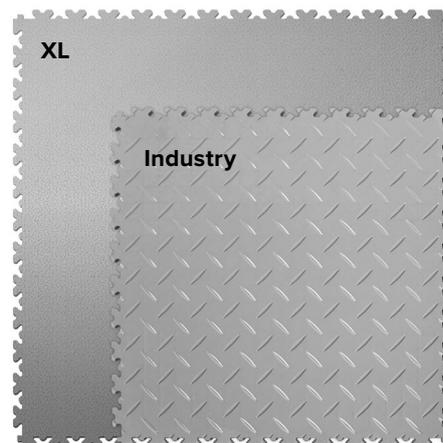

Large format tiles have been gaining popularity worldwide in recent years. We have therefore prepared a tile for you with a surface area that is 64 % greater per unit than usual.

Using XL tiles is versatile. The tiles are good for flooring in the basement, garage and workshop or for public spaces and in shops with moderate traffic. You can choose from a standard color palette with the same technical parameters.

All XL tiles can also be used as wall tiles and thus protect the parts adjacent to the floor.

It is usually the case that the more skillful the craftsmen, the more work they have. The Fortelock XL tile has therefore been designed to easily install itself.

- > Fewer joints and speed of installation – 2.5 tiles in 1 m²
- > An original surface creating an optical afterglow of the floor
- > No need for bonding or fixation
- > Surface good for imprinting
- > Easier maintenance
- > Resistant PVC – homogeneous
- > Czech product
